Dear Katya,

Thank you for your last letter. In your last letter you asked me about natural sciences. I think, what I must tell you about positive aspects and negative aspects.

Learn natural sciences is very interesting. In future you can become what you want. You know new things. Natural sciences - are biology, geography, physics, chemistry. I like this subjects. I think, what everybody like this. You learnt interesting laws.

But, if you think, what this sciences very hard and important you can learn over sciences. Because on this sciences learnt very big time. It is very hard. People, who learnt this sciences must hard work. They must know all laws. Do you like natural sciences?

What you want become?

Do you learnt biology?

Best wishes,  
Sofya
