Dear Kate,

I am sorry I haven't written so long. I was very busy last month but now school over and I can write a letter to you. Things are going ~~to~~ well for me.

In your last letter you asked me to write ^{learning} ~~few~~ words about ~~experience of studying~~ natural sciences. ~~describe any regret~~ Well, ~~I~~ at school. Well, have you ever wondered why you need to learn science in elementary school? Science offers the answers to various questions we ask out of curiosity, in our early years. With the knowledge of science, you learn to think logically and solve a problem. Science helps you learn about the various weather conditions, and helps you distinguish between normal weather and dangerous weather. Because you learn about the characteristics of different objects that you use in your day-to-day life, you will be able to distinguish between things that are safe to eat and those that you should not. ⁵ Almost everything that a person does requires a basic knowledge of science, and logical reasoning that is based on this subject.

So, it is undoubtedly important to learn science from the
days of school.
